T-Dongle

Model: LCD-A2201

CAT5 Transmitter

The T-Dongle is a device for high-density applications where you want full use of keyboards, mouse, and monitor, but there is no room for a server nearby, for applications where you want to keep PC secured and out of the way. The T-Dongle is able to move your console, keyboard, Mouse, and Monitor, to a suitable control field conveniently over existing network construction. You just need install a pair of extender T-Dongle and R-Box into local side and remote side individually. It also saves your cable layout and cable installation cost.

Features

- 3-in-1 space saving design
- Use CAT5, CAT5e, CAT6 Ethernet cable
- 1000 feet away from KVM switch
- Auto adjust video signal boost features ensure that the video signal remains clear
- Data transmission LED indication
- Hot pluggable, easily install in minutes and auto adjust for video signal
- Compatible with DOS, MS Windows, Linux, Unix and Netware
- No software installation
