2. Introduction

RKP Series is a combination of keyboard, mouse and monitor into a drawer, with features such as flip-up design, adjustable brackets, built in LCD OSD to provide effective assistant for an administrator to control PC system.

RKP Series provides cost effective for your limited IT budget over using CRT and rack mounting. Also, it will be space saving for your compact environment rack and effective assistant for an administrator to control PC system.

3. Features

- Unique Monitor flip up design allows viewing through closed glass door of cabinet
- Adjustable mounting brackets from 390 to 650mm (Front to rear 19" mounts)
- Two keyboard selections supporting multiple languages
- Three models to choose from 15", 17" and 19" LCD Panel
- Front-access lock for security
- Supplied with 12V 5A remote power adapter (single power source)
- Built-in KVM switch function for easy controlling and monitoring up to 16 residing servers platforms
- Support one CAT.5 remote console up to 500 feet away from KVM switch.
- Support eight characters password protection and search PC server name
- Auto scan mode for monitoring PCs and flexible scan time from 5 ~ 99 seconds
- Hot Pluggable—Add or remove computers without powering down the switch
- Easily switch individual button to select the PC channel using the push-button channel selector switches, Hot Keys, or via the On-Screen Display (OSD) Menu.

Disclaimer

This information is subject to change without notice. The producer of this manual accepts no responsibility for damage or claims, resulting from misuse or misinterpretation

4. Package Contents

LCD Monitor Drawer with PS/2 KVM Switch (Two Consoles)	1 Piece
User Manual	1 Piece
DC Power Adapter	1 Piece
Power Cord	1 Piece
Mounting Bracket	1 Pair
Fasteners	4 Pieces
LCD-A1004 3-in-1 KVM cable	8 Pieces

Before Unpacking

It is very important to locate the LCD Keyboard Drawer in a suitable environment.

- The surface for placing and fixing the LCD Keyboard Drawer should be stable and level or mounted into a suitable cabinet.
- Make sure the place has good ventilation, is out of direct sunlight, away from sources of excessive dust, dirt, heat, water, moisture and vibration.
- Convenience for connecting the LCD Keyboard Drawer to the related facilities should be well considers too.

Unpacking

The LCD Keyboard Drawer comes with the standard parts shown as above. Check and make sure they are included and in good condition. If anything is missing, or damage, contact the supplier immediately.

5. Optional Accessories

KVM Cable	
LCD-A1004 / 05 / 06	6ft / 10ft / 15ft 3-in-1 KVM cable
Cascade Cable	
LCD-A1018 / 21 / 22	6ft / 10ft / 15ft PS/2 3-to-3 Cascade cable
Conversion Adapter	
LCD-A1001	SUN / iMAC USB to PS/2 adapter

6. Peripheral Products

Model	Description
LCDK1010	8-Port PS/2 KVM switch
LCDK1011	16-Port PS/2 KVM switch

7. Important Safeguards

Please read all of these instructions carefully before you use the device. Save this manual for future reference.

- Unplug the LCD Keyboard Drawer from the power outlet before cleaning.
- Do not spray liquid cleaners or aerosol directly on the device. Wet a cloth with a neutral detergent (e.g. clean water) and squeeze it tight, then clean the screen slightly with it.
- Do not expose the LCD Keyboard Drawer directly to rain, water, moisture or sunlight.
- Do not attempt to service the device yourself. Improper operation may void your warranty. Refer all servicing to qualified service personnel.
- Safe storage environment of the LCD Keyboard Drawer is ranging between – 20°C and 60°C. Permanent damage could occur if the LCD Keyboard Drawer is stored outside the safe range.
- Unplug the keyboard drawer with LCD Keyboard Drawer immediately and call a qualified service personnel under the following conditions:
 1. If the LCD Keyboard Drawer has been exposed to rain, liquid or water.
 2. If the LCD Keyboard Drawer has been dropped or the casing has been damaged.

What the warranty does not cover

1. Any product, on which the serial number has been defaced, modified or removed.
2. Damage, deterioration or malfunction resulting from:
 - a) Accident, misuse, neglect, fire, water, lightning, or other acts of nature, unauthorized product modification, or failure to follow instructions supplied with the product.
 - b) Repair or attempted repair by anyone not authorized by us.
 - c) Any damage of the product due to shipment.
 - d) Removal or installation of the product.
 - e) Causes external to the product, such as electric power fluctuation or failure.
 - f) Use of supplies or parts not meeting our specifications.
 - g) Normal wear and tear.
 - h) Any other causes which does not relate to a product defect.
3. Removal, installation, and set-up service charges.

10. LCD Session

Resolution Settings

For Microsoft Windows

Step 1 – Press right click on the desktop

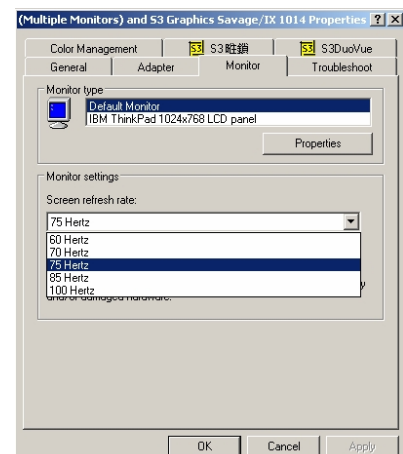

Step 2 – Choose “Properties”

Step 3 – Change the “Screen Resolution”

Step 4 – Change the “Screen refresh rate”

10. LCD Session

Resolution Settings

For SUN Servers

- Resolution configuration procedures should be run by qualified SUN server administrator
- Sun Servers are using resolution at 1152 x 900 x 76Hz.
- Supported resolution mode for 15" LCD:
- 1024 x 768 x 70/75Hz
- Supported resolution mode for 17" LCD:
- 1280 x 1024 x 75Hz
- You need to change the Sun Server resolution before you connect to LCD Display.
- Please do the following procedures to change the resolution settings :
 1. As root:
You may find the following comment `"/user/sbin/m64config"`.
 2. To view current resolution:
Type `"/user/sbin/m64config – prconf"`.
 3. To change to 1024x768 @ 70MHz:
Type `"/user/sbin/m64config – res 1024x768x70 now"`.
 4. The screen will be rubbish.
 5. Then type `"pkill Xsun"`.
And Type `"pkill Xsession"` to restart the Xsession.

Note : Remember to RESTART the server after these processes.

- Under Common Desktop Environment (CDE).
- To change the OpenBoot resolution, you can type the following command in OK prompt.
 1. In OK prompt, type `"setenv output-device screen:r1024x768x70"`.
 2. Type `"printenv"` to confirm the resolution has been changed to 1024x768x70Hz.
 3. Then type, `"reset"` to restart the system.

Note : Remember to RESTART the server after these processes.

KVM Session

11. KVM Session

Front View

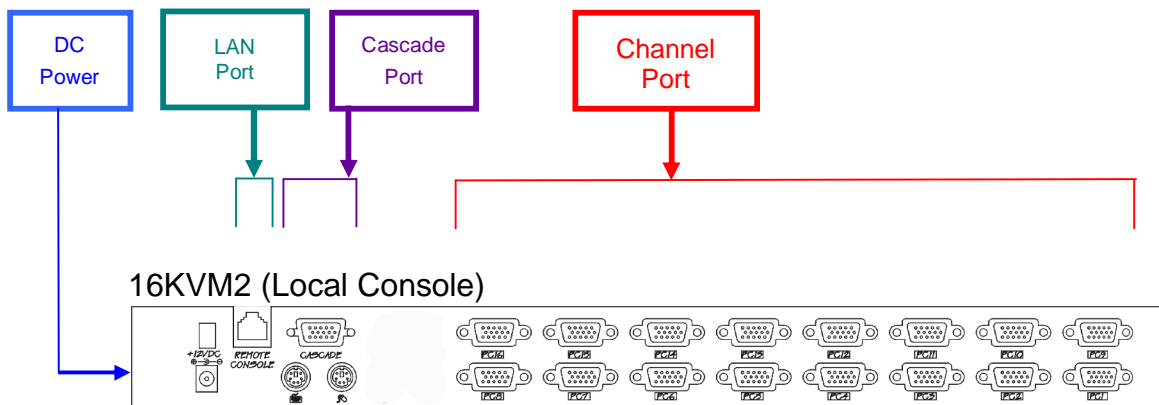

LED Indication

- Selected Channel** - Displayed channel on monitor & red in LED.
- Channel select button** - Press to select channel from 1 – 8.
- Shift button** - Press & Hold follow with a channel button to select channel from 9 – 16.
- Online Channel** - Green LED state the PC has connected and power on.
- Bank no.** - Display the Bank no. from 1 – 8.
- Bank button** - Select the bank from 1 – 8 (for cascade only).

11. KVM Session

Rear View

- DC Power** - connect to external 12V DC power adapter.
- Cascade Port** - connect to additional KVM switch for channel expansion.
- LAN Port** - connect to receiver by UTP / STP cable.
- Channel Port** - connect to PC computer with CD-6 3-in-1 KVM cable.

(Remote Console)

- **DC Power** - connect to external 12V DC power adapter.
- , **LAN Port** - connect to local console by UTP / STP cable.
- f* **Keyboard Port** - connect to PS/2 keyboard
- " **VGA Port** - connect to VGA Monitor
- ... **Mouse Port** - connect to PS/2 mouse

11. KVM Session

Installation Steps

Before installation, please make sure all computers are turned on and its operating system are running properly with keyboard and mouse.

1. Connect the 3-in-1 KVM cable to the one of your server.
 - Mini Din 6-pin Male connector to the USB Port
 - HDDDB 15-pin Male connector to the VGA Port

2. Plug the power adapter included to the switch.

3. Connect STP / UTP cable to the switch.

4. Connect the another end of the 3-in-1 cable to the LCD Keyboard Drawer

5. Connect another end of the STP / UTP cable and mouse, keyboard & monitor to the receiver.

6. Reset PS/2 KVM Switch (Two Consoles) by membrane

11. KVM Session

Cascading

Using a LCD-A1018/21 cascade cable to connect from Bank 1's "Cascade port" to Bank 2's "Console port". After connected please press "Bank" & "Channel" button on the front of the PS/2 KVM switch to reset the KVM switch.

Bank 1

Bank 2

Bank 8 (Max.)

Cascade level Max. : 8 level

- Max. PC connection is 128 or with additional 122 PCs.
- All PS/2 KVM switch is compatible & can cascade with each other.
- Using LCD-A1018 / 21 / 22 cascade cable to cascade.
- Normal distance from one PS/2 KVM to another is 15 feet.

12. Start Up

1. The channels that have PC connected and it is switch on will have a green LED on that channel.
2. The red LED will indicate the selected channel.
3. 7 segments LED will display the bank number.
4. Press channel button to select the channel.
5. Enter the password, default is “00000000” eight zeros.
6. Otherwise the keyboard & mouse will be locked.
7. If you forget your password, send back to Manufacturer.

HotKey Command

- Simple key sequence.
- Press “ Scroll Lock” twice within 2 seconds.
- Follow with a beep sound, going into the hot key mode.
- Need to key in the hot key within 2 seconds.
- Go back to Operation System Control state.

12. Start Up

Hot-key Command Operation

1. Calling OSD Menu

2. Switch to Previous Port (powered on PC only)

3. Switch to Next Power On Port (powered on PC only)

4. Switch to Previous Bank

5. Switch to Specific Port

First digit of Port Number:

0 for Port 0-9

1 for Port 10-16

Second digit of port Number

Example :

a) Bank 1 Port 4

b) Bank 2 Port 16

12. Start Up

HotKey Command Operation

6. Switch to Next Bank

7. Enable / Disable beeper sound

Note: The default Beeper function is ON and beeper control is only for available for Scan Mode.

8. Auto Scan for Powered on PC

9. Reset to factory Default Setting

ROM REFLASH

Note: Not available for password reset.

10. Find Port by name

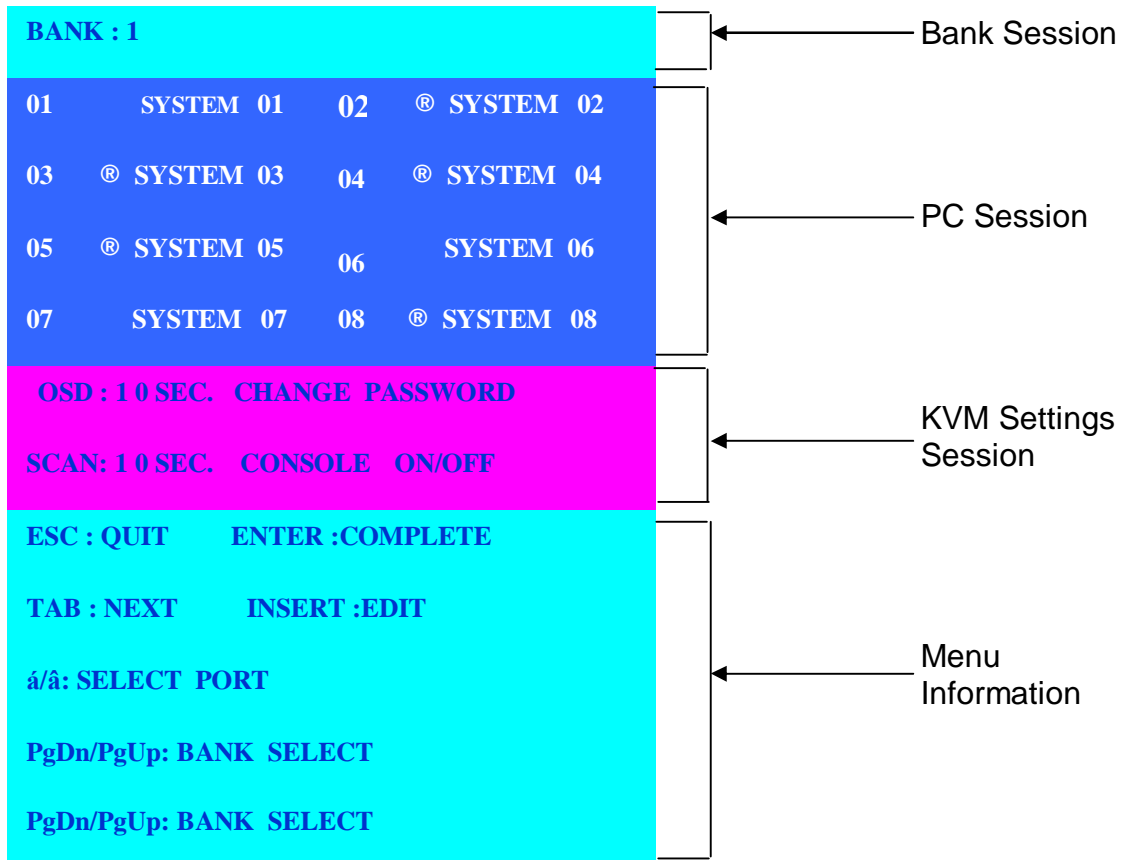

FIND:

Note: When the above dialogue appear, type the PC name and the OSD Menu will search PC name starting from 1st powered on PC port.

12. Start Up

OSD Structure Diagram

OSD Menu Operation

Use “**Tab**” key to select session like Bank, PC, OSD, SCAN, CHANGE PASSWORD, CONSOLE ON/OFF, etc...

Bank Session

Use **Page Up** & **Page Down** to switch previous or next bank

PC Session

1. “®” next to the PC name represents the PC system is powered on
2. Use up arrow key “á” or down arrow key “â” to select port for destination PC name and press “**Enter**” to select
3. Edit PC name - Press “**Ins**” key for editing PC name

Note: PC name should not be more than 8 characters.

4. When editing is finished press “**Enter**”.

12. Start Up

KVM Settings Session

1. OSD
 - OSD Menu on screen time default is 10 seconds.
 - It can be modified from 05 – 99 seconds.
2. Scan
 - Scan interval from one PC port to next PC port when applying auto scan, its default is 10 seconds.
 - It can be modified to 99 seconds for maximum.
3. Change Password
 - Default password "00000000" 8 zeros
 - Choose "Change Password" in KVM Setting Session.
 - Key-in the existing password.
 - Enter the New Password.
 - Re-Enter the New Password.
 - Changing Password complete.
 - The steps are shown as next picture:
4. Console On/OFF
 - ON – any user can use the console
 - OFF – user is not allowed to use the console port, unless password is entered.
 - Default – OFF, you need to key-in password.
5. Escape
 - When the following screen is appeared, you can press "ESC" key to escape.

ENTER PASSWORD : ■

ESC : QUIT ENTER :

ENTER NEW PASSWORD : ■

ESC : QUIT ENTER : COMPLETE

RETYPE NEW PASSWORD : ■

NEW PASSWORD COMPLETE

ESC : QUIT ENTER : COMPLETE

13. FAQ

1. The recommended distance of VGA cable is 5 meters (maximum) without ghosting and degradation.

Normally, the cable length is based on driver capacity of your VGA card. If you need longer VGA cable, please use VGA extender to accomplish your applications.

2. The recommended distance of PS/2 cable is 5 meters (maximum).

Normally, the cable length is based on driver capacity of your motherboard PS/2 port. If you need longer PS/2 cable, please use PS/2 extender to accomplish your applications.

3. Don't press any keys on the keyboard while the selected computer is booting up. Otherwise, it might cause the keyboard error or keyboard is not detected at PC side.

4. The computer boot up fine, but keyboard doesn't work

- Make sure the keyboard works when directly plugged into the computer.
- Try a different keyboard, but use only 101, 102 or 104-key keyboard.

5. The Mouse is not detected during PC boot up.

- Make sure the mouse works when directly plugged into the computer.
- Make sure the mouse is a true PS/2 mouse. A combo mouse will work just as long as it is set for PS/2 mode with the correct adapter. Please try a different mouse.
- Avoiding moving the mouse or pressing the mouse buttons when switching ports.
- Avoiding switching ports during shutting down the PC process.
- When you switch one PC port to another PC port, the best scan time setting need to be set to 5 sec. or more. Normally, the VGA monitor change one resolution mode to another will take one or two seconds. So, the scan time is not recommended to below 5 seconds.

6. The power switch is off, but the switch still works fine or power adapter is unplugged from the switch, but the switch still works fine.

KVM Switch unit draws the power source from power adapter and all PC's PS/2 port. Some PC's PS/2 port can support enough power for the switch, but some PC's PS/2 port (like laptop, notebook computer etc.) is unable to supply enough power for the switch. In order to make sure the system can work steadily, please do not set power switch to off state or remove the power adapter from the switch.

Although the PCs connected to KVM Switch unit are able to support enough power to the stand alone switch, KVM Switch unit still needs a power adapter

13. FAQ

7. If you forget the “password” of the switch (default is 00000000), please contact your supplier.
8. CAT.5 Console Receiver power LED is not ON, to make sure power adapter is connected to KVM CAT.5 receiver.
9. **No video signal is displayed on the remote monitor.**
 - Please check all VGA cables & connectors whether CAT.5 cable & connector is loosed or disconnected. Also, please make sure VGA cable was attached to computer during boot up process.
 - Power adapter is not connected to receiver.

10. **Video signal is foggy or un-cleared on the screen.**

Please check VGA connector, or the VGA resolution is too high for the length of cable being used. If the problem happened at VGA resolution, to shorten the CAT.5 cable length or reduce VGA resolution. It is highly recommended to use “optimal CAT.5 cable length “to get the best video quality and don’t waste unnecessary CAT5 cable. High VGA resolution is up to 1,280 x 1,024 and CAT.5 cable length could up to 500 feet approximately.
