

Mounting the LCD/KVM Console into the Cabinet

(1) First step: Unscrew the two thumbscrews on the front of Console and separate the two brackets as picture shows.

(2) Second step: Fix the front 19" brackets of the console onto the front post of your 19" cabinet. Fix the cabinet screws only to the slider bracket---- **Not to both brackets.**

(3) Third step:

To slide the complete console out of the 19" rack cabinet. This allows the LCD panel to be flipped up.

(4) Fourth step:

Fix the screws on the back of the LCD/KVM Console onto the rear side of your 19" rack cabinet.
